At their July 2013 meeting, the Trustees agreed to make the following grants to Cambridge University Departments. In most cases there is a requirement on the Department to supply matching funding, usually from an external source:

- **Applied Mathematics and Theoretical Physics:** £10,000 over six months towards salary costs for the project ‘Sea Ice Thickness Distribution in the Arctic and Antarctic from Satellite Remote Sensing’ (Professor Peter Wadhams)

- **Archaeology and Anthropology:** £14,850 over two years towards the research costs of the project ‘Where Rising Powers Meet: Russia and China at their Northeast Asian Border’ (Professor Dame Caroline Humphrey)

- **Archaeology and Anthropology:** Underwriting of £13,480 towards the unexpected costs of closing down the site of the Kilise Tepe archaeological project (Professor Nicholas Postgate)

- **Cambridge Stem Cell Institute:** £18,997 over one year towards salary costs for the project ‘Investigation of the Molecular Mechanism of Oct4 in Induced Pluripotency’ (Dr José Silva)

- **Economics:** £38,638 over thirteen months (mostly in the form of underwriting) towards the salary costs of the project ‘Parents Versus Peers: Exploring Determinants of the Socioeconomic Achievement Gap from Childhood to the Teenage Years’ (Dr Jane Cooley Fruehwirth)

- **Economics:** £27,818 over one year, from the Opportunities Fund, towards salary costs for the project ‘A Platform for Interactive Online Experiments’ (Dr Edoardo Gallo)

- **Fitzwilliam Museum (on behalf of the eight museums that make up the University of Cambridge Museums group):** £50,000 over one year towards the salary and other costs of collections care and conservation (Ms Julie Dawson)

- **Medical Genetics:** £19,882 over one year towards salary costs for the project ‘Molecular Phenotyping of the UK-PSC Cohort to Guide the Development of Personalized Medicine for Primary Sclerosing Cholangitis’ (Dr Richard Sandford and Dr George Mells)
